

## Policy of Integrated Systems Management (IMS)

We are a major manufacturer of tools, fixtures, parts and assemblies for the automotive, construction, energy, aerospace and defense industries. We supply our products to customers not only in the Czech Republic, but also to European and other countries around the world. We want to continue to offer products with high utility value in the future.

The management of the company MODELÁRNA LIAZ spol. s r.o. is fully aware of the growing customer requirements for the delivery of products in the required quality, agreed time, quantity and at competitive prices.

To meet these requirements, we have a quality management system in place and declare the following:

### Quality Policy Principles:

#### **The customer comes first**

Our main objective is to supply the customer with quality products and services that meet the agreed requirements. Timely performance and customer satisfaction are our priority.

#### **Efficiency of operations**

We strive for sensible, meaningful and efficient process management. We continually look for ways to reduce unnecessary work, errors and waste.

#### **Environmental protection**

We meet our legal obligations in the environmental field.

#### **Occupational health and safety**

We take care to protect the health of our employees. We provide each employee with personal protective equipment according to their needs and legal requirements.

#### **Suppliers**

We strive to work with suppliers who are able to deliver products and services to the required quality, within agreed deadlines and in accordance with applicable legislation.

#### **Management responsibility**

Top management is committed to creating the conditions for the operation of the quality management system and to implementing this policy in practice.
